Introduction

The Innovation and Entrepreneurship Hub is an advanced online platform co-developed by Intel Corporation. It was created to support the development of Micro and Small and Medium Enterprises (MSMEs), young innovators, and entrepreneurs. The Hub enables entrepreneurs to access online programs to improve their business skills and receive business counseling and mentorship. In addition, entrepreneurs will also be assisted to obtain access to potential financial and technology partners. The Hub aims at becoming an online community for MSMEs, eventually developing into a global collaborative ecosystem.

This manual aims to familiarize users with the Hub and its features. The manual is divided into two parts: the first for Entrepreneurs, the second for Program Managers. Program Managers are advised to read the whole guide.

Part One: Entrepreneurs

From the top right menu, click on Register if you want to create a regular account to browse publicly available content on the Hub. Click on EDIP Application to create an entrepreneur account and access premium content and/or to join a class if you already have a business idea (Fig. 1.1).

CORPORATE TRAINING OFFICE / BAHRAIN

By  Abdul Awadhi2222

Based on my research and involvement in corporate training, I noticed a lack of quality corporate training offices in Bahrain. I believe I can start a small training centre and hire/outsource talented consultants, trainers, and managers who would be interested to receive pay on a part-time basis. This extends to executive coaching as well.

Considering my only true competitor is the B1BF, I believe my reduced overhead and attention to detail (less variety and higher teacher-student ratio) will provide potential customers with reduced prices while matching/exceeding my competitor's quality of courses.
